**We are looking for
bright and
ambitious students
from any area of
Mathematics,
Physics and
Engineering to join
this exciting PhD
program**

**CALL IS NOW
OPEN!**

From epidemics phenomena, climate change and sustainable cities to seismic engineering and Industry 4.0, all the crucial challenges facing mankind today require the development of new methodological approaches to understand, model and engineer ever-growing reliable interdependent, complex and networked systems and infrastructures. If you are interested in the theory and applications of complex systems and risk join this program!

- **8** scholarships, each including a stipend of EUR 19,000 per year, which is increased by 50% when the student is abroad
- Students can work with international experts in risk and complexity and are expected to spend at least 12 months abroad
- Each scholarship also includes additional research/travel funding per year
